

doka

The long-lasting beam.

Doka beam H20 pro – The high-quality formwork beam with a solid-web design

The Formwork Experts.

Doka beam H20 pro

The high-quality formwork beam in solid-web design

Protected, resistant, long-lasting – The Doka beam H20 pro with its cap-sealed ends is a high-quality, solid-web formwork beam for use in wall and floor-slab formwork. Its moulded-on polyurethane beam-end caps extend its usable lifespan and make it an everyday helper on any jobsite.

Reduced damage at the end of the beam

thanks to high-grade polyurethane end reinforcement

High-quality beam flanges

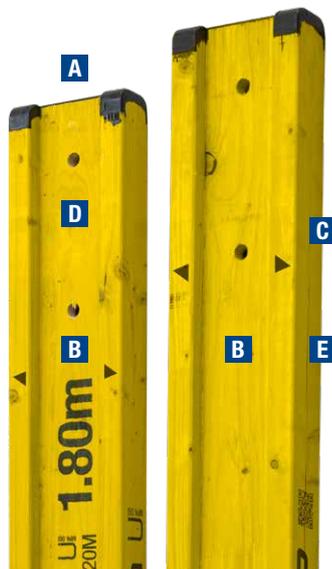

thanks to mechanical stress-grading and proof-testing

Easy to handle

because of very low weight

Fast, safe formwork set-up

with markings on the beam flanges

Technical data

Moment (M): 5 kNm

Shear force (Q): 11 kN

Rigidity (ExJ): 450 kNm²

Weight: 4.4 kg/lin.m

Approval: EN 13377

- A** Pro beam-end reinforcement
- B** Beam web in N version¹
- C** Beams marked in 50-cm increment-grid
- D** 2 system holes at each beam end
- E** Printing on broadside of flange and on web
Optional: custom printing

Length	PU ³	N version	
		kg	Art. n°
